## **LATEST UPDATE**

### **SBI posts Rs 4,876 crore net loss for Q1 on treasury losses, higher provisions**

**The state-owned bank had reported a net loss of Rs 7,718 crore for the March quarter. In June quarter last year, SBI had reported a net profit of Rs 2,005.5 crore**

The country's largest bank [State Bank of India](#) (SBI) on Friday reported a net loss of Rs 4,875.85 crore for the quarter ended June as its provisions for bad loans rose by more than 70 percent year on year.

This is the third straight quarterly loss posted by the public sector lender.

The lender's bottom line was also weighed down by lesser other income, which fell to Rs 6,679.49 crore, primarily because it chose to recognise and report all its treasury losses in the reporting quarter.

#### **The bank attributes the loss towards:**

1. Lower trading income and significant MTM (mark-to-market) losses due to hardening of bond yields.
2. Higher provision on account of Wage Revision and enhancement in Gratuity ceiling.

For the quarter under review, SBI received a tax write back of Rs 2,379 crore against tax paid of Rs 939.05 crore in Q1 FY18. This helped reduce the losses.
